“My Future” Assignment instructions for Professors

It is important that students feel comfortable giving presentations in front of the class. Research shows that one of the most valued skills in an employee is the ability to speak in public. I will give my students the “My Futures” Presentation sheet right after mid-term so they can start working on it. This presentation can be done in any format, and I encourage creativity, as long as they cover the points outlined above. They can bring visuals, power points, etc., or just talk about their “Future”. I will have the students start presenting the last few weeks of class. While the student is presenting, the rest of the class will be filling out a “My Future’s Feedback Sheet” on each student. I will also write my comments on each sheet and then return them to the students on the last day of class.

This assignment supports the Learning Outcomes for the Chapters on Personality, Interests and Values, Career and Education, Communication, and The Future.
